Projects

Curahunt

- Constructed and developed by my group and myself at the hackathon event organized by my college's "Internware" internship cell.
- My team's full stack project, Curahunt, helped us place first runners-up.
- As the leader and SPOC, I had a major influence in the development of the entire project.
- Along with being in charge of database maintenance, I also learned how to use Mongo DB. It was a very rewarding experience that advanced both my mental and skill growth.

Portfolio

- My portfolio website presents my professional accomplishments, initiatives, and abilities in an eye-catching and navigable way.
- It demonstrates my love of visual storytelling and my dedication to creating eye-catching designs that captivate viewers.
- Visitors may explore my work with ease and a flawless user experience thanks to easy navigation.
- Mobile device optimization to guarantee accessibility and appeal to a larger audience.

Ninjago[Prototype]

- An in development 2D platform unity game with a thrilling combat and hidden features.
- Unique features such as wall climbing and challenging traps.
- Challenging physics for a ninja in training and distress.
